The screenshot shows the 'Интеллект' application's interface. On the left is a tree view of system components under 'LOCALHOST [I-POLESHCHUK]': 'Звуковая плата 1 [1]' (Microphone 1 [1]), 'Плата воспроизведения 1 [1]' (Speaker 1 [1]), and 'Устройство видеоввода 1 [1]'. To the right is a 'Отладочное окно' (Debug window) with tabs for 'Очистить' (Clear), 'Цвета' (Colors), 'Фильтр' (Filter), and 'Применить фильтр' (Apply filter). A checkbox 'При применении фильтра' (When applying the filter) is checked. The main area displays an event log entry: 'Event : OLXA_LINE|INVALID_OBJECT_TIME|guid_pk<(DFBD8663-A110-E711-842B-0014D110CA9C)>,time<17:51:50>,fraction<278>,date<24-03-17>,owner<I-POLESHCHUK>'. There are scroll bars at the bottom of the log window.
