

SIP- GAI-Tronics HelpPoint

SIP- *GAI-Tronics HelpPoint* Web- :

1. **IP- SIP- IP Settings.**
2. **SIP SIP Settings.**

The screenshot shows the GAI-TRONICS Configuration window. The title bar includes 'File', 'Edit', 'View', 'History', 'Bookmarks', 'Tools', and 'Help'. The main window has a dark blue header with the GAI-TRONICS logo and 'A Hubbell Company'. Below the header, there's a 'Configuration' tab. The left sidebar contains a tree view with 'Home' at the top, followed by 'Network' (which is expanded to show 'IP settings', 'SIP settings', 'Unit settings', 'Access settings', 'Serial settings', 'Email settings', and 'Clock settings'), 'Phone functions' (with sub-items 'Dialing & Memories', 'Key mapping', and 'Current status'), and 'Signals and Audio' (with sub-items 'Audio settings', 'Alarm settings', 'Tone settings', 'LED settings', and 'Logic settings'). The 'SIP settings' item is selected and highlighted with a red oval. To the right of the sidebar, there's an 'Edit' button. The main content area displays 'Module: SIP settings' and a list of parameters under 'SIP 1 Parameters'. These parameters are: LOCALID (12345), DOMAIN, PROXY, PROXYPORT (5060), PRIORITY (1), REGISTRAR, REGISTRARPORT (5060), USERNAME (12345), PASSWORD, and ENDPOINT (ENABLED). Each parameter name is circled in red, and each value is also circled in red. On the right side of the window, there's a 'Configuration' section with a page indicator 'Page 1 - General SIP Info,' followed by links for '2 - SIP 1 Info,' '3 - SIP 2 Info,' '4 - SIP 3 Info,' and '5 - SIP 4 Info'.
