The screenshot shows the SafeNet Sentinel Admin Control Center Help page. The left sidebar has a purple header "Options" containing links: Sentinel Keys, Products, Features, Sessions, Update/Attach, Access Log, Configuration, Diagnostics, Help, and About. The main content area has a yellow header "Sentinel Admin Control Center". Below it is a sub-header "Admin Control Center Help". The text says: "Welcome to the Admin Control Center. This application enables you to manage access to software licenses and Features, to control detachable licenses, to control sessions, and to diagnose problems." It also notes: "Note: You can select the language in which Admin Control Center is displayed by clicking the country flag appropriate to the required language, which is displayed at the bottom of the Options pane). To view all available languages, or to download other language packs, click the More Languages link." At the bottom, it lists what the Admin Control Center monitors: "The Admin Control Center enables you to monitor the following:" followed by a bulleted list: "• All the Sentinel protection keys that are currently available on the network server, including their identity, type, and location • The number of users currently logged in to a protection key, and the maximum number of users allowed to be simultaneously logged into that specific key • The Features to which each protection key allows access, and any restrictions that apply to the Feature".
