The screenshot shows the 'Настройки распознавания' (Recognition Settings) window. It includes sections for 'Выбор видеокамер' (Video Camera Selection), 'Настройки детектора' (Detector Settings), 'Границы области поиска' (Search Area Boundaries), and 'Расчет направления' (Direction Calculation). The 'Канал распознавания' (Recognition Channel) is set to '1'. The 'Модуль' (Module) is 'cmaccr-1.30.dat'. The 'Порог поиска зоны' (Search Area Threshold) is '21'. The 'Макс. ширина' (Max. Width) is '9' and 'Макс. высота' (Max. Height) is '2'. The 'Мин. ширина' (Min. Width) is '2' and 'Мин. высота' (Min. Height) is '1'. The 'Вырезать изображение с автомобилем' (Crop image with car) and 'Разрешить распознавать изображение по запросу' (Allow image recognition on request) are checked. The 'Область поиска' (Search Area) is checked. The 'Задействовать GPU' (Use GPU) is checked. The 'Устройство по умолчанию' (Default device) is 'Устройство по умолчанию'. The 'Направление' (Direction) is 'от камеры' (from camera). The 'Въезд' (Entrance) is checked.
